

Project Proposal

Table of contents

Title of Project: Team member names:

Name	Email	JHED
Mao Yang	myang112@jh.edu	myang112
Jia Yu Pan	jpan49jh.edu	jpan49
Rozanne Lim	rlim8@jh.edu	rlim8
Fan Yu	fyu24@jh.edu	fyu24

- You should describe a research or data analysis question and explain its importance

Question: What component (genre, show length, director, cast) make shows and movies popular, and how can reviewer sentiment predict box office revenue?

- You should summarize work that already exists (if it does) Jia Yu Pan Fan Yu
- You should outline the work you plan to do
- Identifying variables that are associated with popularity shows and movies
- Collect data using API and rvest
- Analyze data using functional programming paradigms and R packages
- Create data visualizations of movie popularity (revenue) by the different variables [dashboard] (word cloud, etc.)
- Predictive - variables, reviewer sentiment predict box office revenue for upcoming movies

Rozanne Lim

- You should demonstrate you have access to the data, describe the data, and propose how you will collect the data

Mao Yang

- The Movie Database (<https://www.themoviedb.org/?language=en-US>)
- Just Watch API (<https://www.justwatch.com/us/lists/public-lists>)
- OMDb API (<https://www.omdbapi.com/>)
- IMDB (<https://www.imdb.com/>)
- Trakt API (<https://trakt.docs.apiary.io/#>)
- Rotten Tomatoes (<https://www.rottentomatoes.com/>)
- Box Office Mojo (<https://www.boxofficemojo.com>)
- You should describe the programming paradigms you plan to use and why it makes sense to combine them for your project

Fan Yu

- Functional Programming Paradigm
- Machine Learning Programming Paradigm
-
- You should describe any packages and/or software you plan to use

Mao Yang

- rvest (HTML)
-
- You should briefly describe the data analytic product you plan to build

Rozanne Lim

- Dashboard shiny
- You should describe a tentative timeline for the proposal
- Meeting with Professor Stephanie Hicks Nov 17
-
- Final Project Presentation Dec 20
- You should describe how the tasks will be split amongst the team members
